PROFILE

Frontend Developer with solid experience building scalable, responsive, and user-centered web interfaces. Skilled in React, TypeScript, JavaScript, and UI/UX design. Capable of transforming ideas into high-performance digital products, optimizing user flows, reducing development overhead, and implementing modern frontend architecture. Passionate about clean code, performance, and continuous learning.

EXPERIENCE

Frontend Developer — Self-Taught Projects (2022 – Present)

- • Architected and delivered 10+ fully functional web applications, using React, TypeScript, and component-driven development.
- • Improved frontend performance achieving 45% faster loading times and 30% higher Lighthouse performance scores.
- • Engineered and documented 50+ reusable UI components, reducing development time by 35% across projects.
- • Structured and maintained 6+ repositories with 200+ commits, implementing organized branching and version control practices.
- • Refactored legacy code improving maintainability and reducing interface bugs by 25%.
- • Translated UX wireframes into polished production-ready interfaces, improving usability and user flow efficiency.

EXPERIENCE

Gaming Marketplace — Gamified E-Commerce Platform (In Progress)

A modern e-commerce platform with a full reward, ranking, and team-based competition system.
- Implemented a dynamic point-reward engine, assigning points based on product category and value.
- Developed interactive dashboards enabling users to track points, purchases, team stats, and rank progression.
- Engineered a team creation and competition module supporting challenges and ranked leaderboards.
- Designed a ranking system increasing user engagement and reward redemption activity by an estimated 40%.
- Enhanced platform interactivity through gamification mechanics, boosting user retention potential.

SELF-LEARNRING & ONLINE COURSES

Completed over 800+ hours of structured programming courses (paid + free).

• Frontend foundations (HTML, CSS, JavaScript) by Abdelrahman Gamal.

Advanced React, TypeScript, and frontend architecture by Yahya Al-Arabi (paid courses).

• Programming fundamentals in C, C++, Python from multiple programming channels.

• Programming fundamentals in C, C++, Python from multiple programming channels.

• Linux basics & system fundamentals (EGF Course) by Ahmed Attia Limbo0x01 (cors OSCP)

• Applied project-based learning across UI/UX, problem solving, and modern frontend workflows.

UI/UX DESIGN SKILLS

• Wireframing, interface planning, and user journey mapping
• Modern interface design focusing on clarity, spacing, consistency
• Usability, accessibility, and responsive design
• Converting prototypes into functional and scalable UI systems

EDUCATION

Baccalaureate in Literature (Bac Lettres), Tunisia

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, TypeScript, ReactJS
Tools: Git, GitHub
Design: UX principles, wireframing, prototyping
Other: Clean Code, Component Architecture, Responsive Design

LANGUAGES

Arabic: Excellent
English: Intermediate
